Fiber-Optic Accessories
E39

## Various Accessories Expand the Usefulness of the Fiber-Optic Cables

- Lenses extend sensing distances
- Side-view attachments provide space savings
- Flexible stainless steel tubes protect plastic fibers from mechanical damage
- Thin fiber adapters as replacement
- Splices for 2.2 mm fiber can be used to repair cut fiber
- Pinpoint focusing lens for precise positioning

## Ordering Information

## ■ ATTACHMENTS

| Description | Part number |
| :--- | :--- |
| Focusing lens pair (use with E32-TC50/200/500/1000, E32-T11(L), E32-TC200C, E32-T61) | E39-F1 |
| Side-view reflector pair | E39-F2 |
| Convergent beam conversion kit (to fit fibers that accept E39-F1 lenses) | E39-F3 |
| Pinpoint focusing lens (for E32-D32, E32-C42, E32-C31, E32-C41) | E39-F3A, -F3A-5, -F3B, -F3C |
| Side-view diffuse reflective conversion kit (for through-beam fibers) | E39-F5 |

PROTECTIVE STAINLESS STEEL FLEXIBLE TUBES FOR PLASTIC FIBERS

| Description | Appearance |  | Length (L) | Part number |
| :---: | :---: | :---: | :---: | :---: |
| E32-DC200E, E32-DC200F(4), E32-D21, E32-D21L |  | Single tubes | 0.5 m | E39-F32A5 |
|  |  |  | 1 m | E39-F32A |
| E32-DC200, E32-DC200B(4), E32-CC200, E32-D11 E32-D11L, E32-D51 |  |  | 0.5 m | E39-F32D5 |
|  |  |  | 1 m | E39-F32D |
| E32-TC200E, E32-TC200F(4), E32-T21, E32-T12L |  | Pairs | 0.5 m | E39-F32B5 |
|  |  |  | 1 m | E39-F32B |
| E32-TC200, E32-TC200B(4), E32-T11, E32-T11L, E32-T51L |  |  | 0.5 m | E39-F32C5 |
|  |  |  | 1 m | E39-F32C |

ADAPTERS/REPAIR PARTS

| Description | Part number |
| :--- | :--- |
| Thin fiber adapter (1.0 mm to 2.2 mm dia.) | E39-F9 |
| Splice for 2.2 mm dia. fiber (except E32-T51/E32-D51) | E39-F10 |
| Fiber cutting tool (supplied with each trimmable plastic fiber optic cable) | E39-F4 |
| Fiber probe bending tool | E39-F11 |
| Mounting bracket replacement for E32-T16 (order two) | E39-L4 |

## Dimensions

## Installation

## ■ INSTALLING ACCESSORIES

## E39-F1 Lens Kit

This pair of lenses increases the sensing distance of selected fiber-optic cables. To install, screw each lens onto the threaded tip of each sensing head.

| Amplifer | Sensing distance with fiber-optic cables |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## E39-F2 Side View Attachment

These attachments provide $90^{\circ}$ angle viewing for through-beam cables. Use then with E32-TC50, E32-TC200 and E32TC200C plastic filament cables and E32T61 glass filament cables. Screw each piece onto the threaded tip of each sensing head.

Note: This attachment does not increase sensing distance.

## E39-F3 Diffuse Reflective Conversion Bracket

This bracket converts through-beam fiber cables for diffuse reflective sensing. Use it with E32-TC50, E32-TC200 and E32TC200C plastic filament cables. A set of E39-F1 lenses are supplied with this conversion bracket. To install, first remove the mounting nuts from the fiber-optic sensing heads. Then loosen the two set screws on the bracket. Insert the sensing
ends through the bracket, then attach the lenses. Tighten the two set screws to hold the sensing heads in place. Mount the bracket at the detection site, then loosen the large center screw to adjust the angle. When the angle that produces reliable detection has been found, tighten the screw to retain that angle.

## E39-F3A Reflective Unit Lens (for E32-D32 Fiber)

When E39-F3A is attached to an E32-D32 fiber, adjust the focal point so that the amplifier will not detect its own light reflected from inside the E39-F3A.

Place the object to be detected or while paper at the sensing distance, then adjust the insertion depth of the fiber into the

E39-F3A so that the light spot is as small as possible. Then fasten the sensing head using the Allen head wrench supplied with the E39-F3A.

In the example shown,
A = The focus is farther than the E39-F3A
$B=$ The focus is closer than the E39-F3A.

## E39-F5 Diffuse Reflective Side View Conversion Block

This reflective side view block may be used with E32-TC200A plastic filament fiber-optic cable only. It provides a 2 cm ( 0.79 in ) sensing distance. To install, first remove mounting nuts and washers from fiber-optic sensing head. Then, screw the threaded heads as far as they will go onto the mounting holes on the narrow side of the block.
